

SILVER STREAK

The Standard of Quality for Over a Quarter of a Century.

Introducing Silver Streak...

Destined to become the standard of excellence in serviceability, comfort, and unprecedented beauty.

Custom Engineering at its finest. Step inside a Silver Streak and discover the engineering marvels that place this recreational vehicle in a class of its own. Give it your most critical examination –from its classic door knobs to its massive chassis–and you will agree that this is indeed the answer to your travel dreams.

Its aerodynamic futuristic design and styling guarantees that yours is a sound investment now and in future years. Its all-aluminum roof and sidewalls are riveted together –aircraft style–making this exclusive feature a framework of safety and reliability. Its spacious interior presents an atmosphere of refined elegance where luxurious furnishings and interior appointments will be in perfect harmony with your particular lifestyle.

When you invest in a Silver Streak, we know your enjoyment is planned for many years. Your Silver Streak will bring you a distinctive atmosphere of elegance and style that will transport you to an exciting world where your travel dreams will come true in superb comfort and safety.

AIRCRAFT-TYPE CONSTRUCTION

SS

True aircraft construction is an exclusive feature of Silver Streak—the only manufacturer of an all-aluminum trailer that builds its own roof bows, door jambs, and floor channels—an outstanding demonstration of true quality control.

Two individual shells form the body of your Silver Streak separated 2-inch high-density, hand-packed fiberglass in the roof and sidewalls. The floor is insulated by a layer of 4-inch fiberglass and a cushion of air 4 inches wide. The double wheel well covers are also insulated with 2-inch fiberglass, and the underbelly is completely sealed to protect the frame and interior from dust and the elements. The generous capacities of the sewage tank and separate waste water tank provide complete self-containment.

SILVER STREAK CONSTRUCTION—An example of precision engineering that will last a lifetime.
